APPLICATIONS

THE TAVERN

- A Dungeons and Dragons inspired app where users can create a starting character, including a quiz, interactive character creation, and multiple sources of information
- Developed in a team of four over the course of eight days. Created with MongoDB, Postman, Bootstrap, Vue.js, Node.js, HTML and CSS.
- Personally worked on back end functionality, character creation UX, writing quiz questions, and front end functionality.

BILL BOARDS

- A Kanban workflow app where users can create multiple boards containing lists, tasks and comments. Users can track what tasks have been completed.
- Created with MongoDB, Postman, Bootstrap, Vue.js, Node.js, HTML and CSS. Created in a team of three over the course of four days.
- Personally worked on back end functionality, front end styling and half of front end functionality.

EXPERIENCE

Software Development Student

Codeworks | march - june 2021

- Utilized partnered programming to create numerous small scale applications
- Created multiple full-stack applications in teams and individually
- Completed nightly computer science theory readings and journaled responses
- Implemented Scrum best practices to remain on time and efficient

Child Development Accounting Technician

Treasure Valley YMCA | April - September 2020

- Reclaimed over \$7,500 in outstanding debts
- Developed and documented the definitive debt collection process for the Treasure Valley YMCA's Child Development Department
- Oversaw the training of the debt collection process to the Child Development Accounting Department
